## Customized Jet Boats 12 and 24 passenger Now Available

Established in New Zealand for over 30 years, jet boating has proven to be a safe and profitable venture. Smoky Mountain Jet Boats is proud to have teamed up with some of the premier operators and designers to bring this exciting technology to the U.S.

These state-of-the-art aluminum boats, ride like a ski on the surface of the water, providing an exhilarating ride for their passengers. Combine the adrenaline buzz of white-water rafting with Nascar® racing. The New Zealand style of driving ensures passengers have a safe thrilling ride – and BEST OF ALL – it's suitable for all ages. With only four inches of draft they have the unique ability to complete a Hamilton spin - a flat spin within the boat's own length.

The maneuverability of these craft is a special feature, bringing a whole new aspect to commercial watersports.

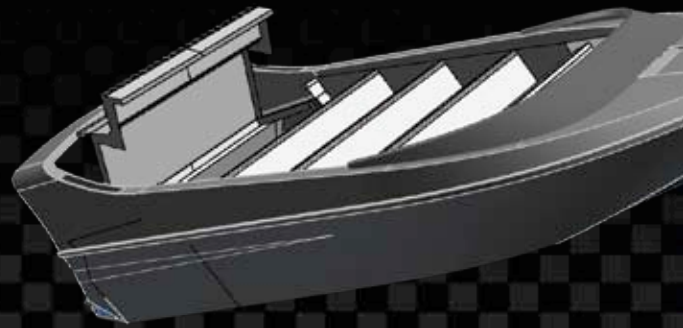

Purchase of our Coast Guard approved boats includes advice on logistics, customer service and merchandizing.

### ADVANTAGES OF OWNING A JETBOAT RIDE BUSINESS:

- Boats are COI and approved for operation in the U.S.
- Jet boats are trailerable – business can move to a variety of locations.
- Business is easy to run. Reasonable costs to establish the business.
- Year-round opportunity (depending on locale).
- Small staffing needs.
- Quick start-up time.
- Training, computer set-up, business operational details, and marketing techniques are available.
- Other profit-making items easily added (photos, snacks, drinks, t-shirts, cameras, souvenirs)

### OUR COMMITMENT:

Our years of experience, training and our willingness to work closely with each owner/operator, gives us the edge over our competition. Our staff are experienced and committed to providing you with quality training. Training at our location is required by the USCG and is included in the price at our Bryson City Location.

## 18.5 FT 11 PASSENGER SINGLE JET

## **NEW FOR 2010 23 PASSENGER TWIN JET**

Operations currently using our Jetboats include: Ocean City MD, Key West, Clearwater, Daytona Beach, Big Bear Lake CA, Saipan and Guam. An exclusive agreement for your area is available. Call us for more detailed information, to schedule a test run and a visit to our building facility.

## **TECHNICAL INFORMATION**

We currently offer two commercial designs. Our Classic Jetboat at 18.5 ft. carries 11 passengers plus a Captain. Powered with a 8.1 L/ 496-cubic inch engine, that produces 375 horsepower with 335 ft-lbs of torque. Couple this with the reliable HAMILTON 212 JET UNIT and 4.0 impeller and the result is a high performance, quick to plane, excellent boat. The 12-degree variable bottom hull has a robust .375-inch thick center ski of low maintenance marine grade aluminum and .190-inch thick sides to provide years of reliable service and thrilling rides. Gas Usage runs between 10 - 16 gallons per hour, depending on load, drive style and engine type.

These boats are certified for use on any navigable waters under Coast Guard jurisdiction: the COI (Certificate of Inspection) issued is for rivers, lakes, bays, and sounds - partially protected waters - for voyages of 30 minutes or less, with 11 passengers plus a captain, and with waves of less than 3.28 feet. A new stability test complying to USCG's requirement of 185lbs per passenger has been completed. Also necessary is an area of relatively flat water with a route of about 4 miles for an 8-mile round trip in 30 minutes. Both models require a 25 ton Master's License to operate in US Coast Guard waterways.

**NEW FOR 2010** is our 23 passenger with a twin jet powered by a pair of 6.2 liter 385 hp Kodiak Marine engines coupled with twin Hamilton 212 jets. Featuring many of the same attributes as our 11 passenger boat: the same thrilling ride featuring the Hamilton Spin with increased capacity and profitability, low staffing needs, robust and light weight aluminum construction and efficient power package (estimated 15 to 25 gallons an hour fuel consumption). We are requesting a "Near Coastal" designation from the USCG. Crew and route designation will be approved by your local Coast Guard office.

### **BOTH 2010 MODELS INCLUDE:**

- Improved steering and reverse
- Quieter exhaust
- Individual adjustable Captains chair
- Category C. CE certified
- Dry Engine hatch
- Improved Electrical system
- Enhanced design to ensure easy access for all over maintenance and inspections.
- Operations and training manual that includes maintenance logs (Daily, 25-hour, 100-hour)
- A critical path of parts replacements is provided.

# *Here is what some of our passengers have to say.*

**By far the best adventure per minute we've done yet!"**

Paul & Jacky, Lancaster PA

**"This was the best ride we have ever been on! The spins were fantastic!"**

Shane and Sherrie, Lexington NC

**"Better than Christmas"** Pixie, Australia

**"Awesome"** – written by hundreds of riders....
